Name:	Vegetables	*I can explain how images add to and make information clear in a text.
		*I can identify pictures, charts, & graphs in an informational text.

The Vegetables that we eat are parts of plants. When you eat a carrot, you are eating the root of the carrot plant. The part of the carrot you eat grows underground. Above the ground, you can see the stem and the leaves of the carrot plant.

- 1. What does the diagram show?
 - A. what each part of the carrot is called
 - B. why carrots are good for you
 - C. how to cook carrots
 - D. how to pick carrot

2. What part of the carrot is found underground? Explain how the diagram makes this information clear.

Do not write outside this box.
